

# ABOUT THE NEVADA CONSERVATION LEAGUE

The mission of the Nevada Conservation League is to help protect Nevada's land, air and fragile water supplies through public education and advocacy within the Nevada State Legislature. We support and elect pro-conservation candidates at all levels of government who make the protection of our quality of life their #1 priority.

The Nevada Conservation League works with individuals, organizations, businesses and government agencies to accomplish its goals.

## We Help Elect Pro-Conservation Candidates

A Pro-Conservation Candidate is a person who carries the same convictions that you do about the importance of a clean, healthy natural environment and is willing to run for public office to fight for those beliefs. Our pro-conservation lawmakers introduce legislation, lead in committee and work behind-the-scenes to pass laws that will protect our quality of life and block those that undermine sensible conservation policy.

## We Support Sensible Conservation Policy

The Nevada Conservation League is your voice in Carson City. Our lobbyist works with the environmental community and elected officials to pass sensible conservation policy. When you make calls, write letters and send e-mails to your representatives, you are helping our team fight for strong legislation that protects our quality of life. Your participation puts legislators on notice that the conservation community is watching.

## We Tally the Votes

The *Nevada Conservation Scorecard* is a tool you, the voter, can use to distinguish those legislators who vote for laws that protect our quality of life from those who offer empty promises. This scorecard provides non-partisan, objective information about how each legislator voted on important conservation issues.
